

International Health Certificate Client/Pet Information Form

Due to changes in the USDA protocol, we require that you schedule two appointments with the veterinarian. The first appointment must occur 20-30 days prior to travel. The second appointment will be scheduled 3-10 days prior to departure. Depending on where you are travelling to, your pet may need a third appointment to receive his/her deworming medication from the veterinarian.

This form **must** be completed and submitted to the hospital prior to your first International Health Certificate appointment.

******If you are traveling within 14 days we cannot guarantee that the proper paperwork will be filed in time******

******Hawaii and some "rabies free" countries have very strict import laws. Please allow us 6-9 months to ensure all bloodwork/vaccinations are done according to their timeline.*****
